Appendix A: Sample Conservation Easement for USACE

CONSERVATION EASEMENT

_____(Grantor) is the owner of that real property more particularly described and shown in Exhibit "A" (hereinafter the "Property") attached hereto and made a part hereof. The approximately _____-acre Property is also referenced in "The Mitigation Plan For _____". The Property is subject to the conditions of Department of the Army Section 404/Section 10 Permit Number _____, dated _____, or a revision thereof. One of the conditions of the referenced permit requires restrictions be placed on the deed for the Property for the purpose of providing compensation for adverse impacts to waters of the United States". Any activities, not included in the permit which may, in the future, be conducted within the Property and will affect the vegetative and hydrologic condition outlined in the success criteria of the Mitigation Plan, must be approved by the United States Army Corps of Engineers (USACE), Galveston District, Regulatory Branch, prior to initiation. This Conservation Easement is created pursuant to the Texas Uniform Conservation Easement Act of 1983 in Chapter 183 of the Texas Natural Resources Code. It is the purpose and intent of this Conservation Easement to assure that the subject lands will be retained and maintained forever predominantly in the vegetative and hydrologic condition described in the success criteria of "The Mitigation Plan for _____".

WHEREAS, Grantee is qualified to hold a conservation easement, and is either

(a) a governmental body empowered to hold an interest in real property under the laws of this State or the United States; or

a charitable, not-for-profit or educational corporation, association, or trust: *, qualified under §501 (c)(3) and § 170(h) of the Internal Revenue Code]*, the purposes or powers of which include one or more of the purposes (a)-(e) below;

WHEREAS, the purpose of this Conservation Easement include, without limitation, one or more of the following:

(a) retaining or protecting natural, scenic, or open-space aspects of real property;
(b) ensuring the availability or real property for recreational, educational, or open-space use;
(c) protecting natural resources;
(d) maintaining or enhancing air and water quality;
(e) preserving the historical, architectural, archaeological, or cultural aspects of real property.

The parties to this agreement include the USACE Permit Applicant, the Grantor, and the Third-Party Administrator (Grantee) who hereby agree that a conservation easement is created which will be subject to the following conditions:

1) Property Description

(Applicant) will provide as Attachment A-1:

(a) On-site photographs taken at appropriate locations on the Protected Property including all major natural features; and

(b) A copy of the deed with an accurate legal description or a current survey certified by a Texas Registered Professional Land Surveyor (RPLS) of the Protected Property.

(c) A copy of a verified wetland survey map, which delineates all waters of the United States, including wetlands within the Property.

2) Term

These restrictions shall run with the land in perpetuity and be binding on all future owners, heirs, successors, administrators, assigns, lessees, or other occupiers and users. The owner must file this Conservation Easement of record with the County Clerk of _____ County, Texas within 10 days of the date this document is signed and provide a copy of the recorded conservation easement to the USACE, Galveston District within 30 days of filing.

3) General

Except for such specific activities as authorized pursuant to DA Permit Number _____, the following activities are prohibited on the Property subject to this Conservation Easement:

(a) There shall be no filling, excavation, mining or alteration of the Property that will affect the success criteria outlined in the Mitigation Plan unless approved in writing in advance by the USACE, Galveston District.

4) Rights of Access and Entry

The USACE shall have the right to enter and go upon the Property for purposes of inspection, and to take actions including but not limited to scientific or educational observations and studies, and collection of samples.

5) Grantor's Reserved Rights

Notwithstanding the foregoing Restrictions, Grantor reserves for Grantor, its heirs, successors, administrators, and assigns the following Reserved Rights, which may be exercised upon provision of prior written notice to Grantee and to the USACE, except where expressly provided otherwise:

(a) Reserved Rights, Grantor reserves the right to engage in all acts or uses not prohibited by the Restrictions, and which are not inconsistent with the conservation purposes of this grant, which is the preservation of the Property substantially in its natural vegetative and hydrologic condition described in the Mitigation Plan.

[Insert for approved mitigation banks: (b) Grantor reserves the sole and unrestricted right to sell credits or other entitlements or interests in the Property in order to perfect and carry out the purpose of a mitigation bank.]

[Additional, case-specific reservations may be listed e.g. wildlife management plans]

6) Enforcement

This Conservation Easement may be enforced by the Grantee and the USACE, or its successor agencies, in an action at law or equity against any person(s) or other entity/entities violating or attempting to violate this Conservation Easement. Any forbearance on the part of the USACE to exercise its rights in the event of a violation shall not be deemed or construed to be a waiver of their rights hereunder in the event of any subsequent failure of the Grantor to comply. In the event of a breach of the Conservation Easement by the Grantor, Grantee, or

another party, or any party working for or under the direction of the Grantor or Grantee, the USACE must be notified immediately. If the USACE becomes aware of a breach of the restrictions, the USACE will notify the Grantor and Grantee of the breach. The parties shall have thirty (30) days after receipt of such notice to undertake actions that are reasonably calculated to swiftly correct the conditions constituting the breach. If the conditions constituting the breach are corrected in a timely and reasonable manner, no further action is warranted or authorized. If the Grantor or Grantee fail to initiate such corrective action within thirty (30) days or fail to complete the necessary corrective action, the USACE may undertake such actions, including legal proceedings, as are necessary to effect such corrective action.

7) Assignment or Transfer

It is understood that this Conservation Easement and any obligations under this Conservation Easement shall not be assigned by Grantee or Grantor, except to another organization qualified to hold such interest under the applicable state and federal laws. The USACE shall be notified in writing of any intention to reassign this Conservation Easement to a new Grantee. A copy of the acceptance must be delivered to the USACE. The Conservation Easement will then be recorded and indexed in the same manner as the original instrument and a copy of the new Conservation Easement must be furnished to the USACE.

8) Warranty

Grantor warrants that it owns the Property in fee simple and that there are no outstanding mortgages, tax liens, encumbrances, or other interests in the Property which have not been expressly subordinated to this Conservation Easement. Grantor further warrants that Grantee shall have the use of and enjoy all the benefits derived from and arising out of this Conservation Easement.

IN WITNESS WHEREOF, Grantor, Grantee and Applicant have executed this Conservation Easement, on the date written hereon. By its execution and acceptance of this Conservation Easement, Grantor, Grantee and Applicant accept the third-party rights of enforcement herein.

STIBNITE GOLD PROJECT STREAM RESTORATION GOALS, OBJECTIVES AND APPROACH:

1. PROJECT GOAL IS TO RESTORE STREAMS AND ASSOCIATED RIPARIAN CORRIDORS WITHIN THE STIBNITE MINE TO BETTER THAN EXISTING CONDITIONS POST MINING OPERATIONS.
2. STREAM DESIGN OBJECTIVES INCLUDE:
   - REMOVAL OF YELLOW PINE PIT BARRIER TO RESTORE FISH PASSAGE AND MAKE APPROXIMATELY 29,500 LINEAL FEET OF THE EAST FORK SOUTH FORK SALMON RIVER (EFSFSR) AND MEADOW CREEK ACCESSIBLE TO ANADROMOUS FISH FOR THE FIRST TIME SINCE 1938.
   - RESTORE AND ENHANCE ROUGHLY 14.5 MILES OF PERENNIAL AND NON-PERENNIAL STREAM AND RIPARIAN HABITAT.
3. THE OVERALL STREAM ENHANCEMENT AND RESTORATION APPROACH IS TO RESTORE PERMANENT FISH PASSAGE ABOVE THE EXISTING YELLOW PINE PIT BARRIER BY FILLING THE PIT AND BUILDING A NEW STREAM CHANNEL OVER THE TOP OF THE FILL, RESTORE HIGH-QUALITY STREAM CHANNELS OVER THE TOP OF AREAS THAT WILL BE IMPACTED BY FUTURE MINING OPERATIONS; AND ENHANCE CERTAIN STREAMS THAT WILL BE OTHERWISE UNAFFECTED BY MINING.
   - ENHANCE = IMPROVE PHYSICAL CHANNEL PROCESSES AND HABITAT WITHIN THE EXISTING STREAM CHANNEL.
   - RESTORE = CREATE A NEW STREAM CHANNEL WHERE THE NATURAL CHANNEL HAS BEEN FILLED OR OTHERWISE ALTERED BY MINING-RELATED ACTIVITIES.

CONCEPTUAL DESIGN PHILOSOPHY:

1. THIS CONCEPTUAL DESIGN SHOWS PROPOSED CONDITIONS AT POST MINING OPERATIONS.
2. THE PROJECT AREA HAS BEEN DIVIDED INTO MULTIPLE REACHES FOR EACH STREAM CHANNEL.
3. STREAMS HAVE BEEN DIVIDED INTO REACHES BY VARIATION IN CHANNEL SLOPE, CHANGES IN DRAINAGE AREA (TRIBUTARY CONNECTION), AND CHANGES FROM RESTORATION TO ENHANCEMENT.
4. EACH STREAM REACH DESIGN INCLUDES ONE OR MORE PLAN VIEW SHEETS DEPICTING THE CHANNEL PATTERN AND ASSOCIATED FLOODPLAIN WIDTH. THESE PLAN VIEW SHEETS SHOW THE PROPOSED OR EXISTING CHANNEL ALIGNMENT AND PROVIDE METRICS INCLUDING PROPOSED VALLEY LENGTH, PROPOSED CHANNEL LENGTH, PROPOSED CHANNEL SINUOSITY, PROPOSED VALLEY SLOPE AND PROPOSED CHANNEL SLOPE ON A PER REACH BASIS.
5. FOLLOWING EACH REACH'S PLAN VIEW DESIGN SHEETS IS A TYPICAL DIMENSIONS SHEET THAT REPRESENTS APPROXIMATELY ONE FULL MEANDER WAVE LENGTH. THESE SHEETS PROVIDE A TYPICAL RANGE IN DIMENSIONS FOR CHANNEL SHAPE IN SECTION, PLANFORM AND VERTICAL PROFILE. CONCEPTUAL SECTIONS INCLUDE A TYPICAL SECTION AT A RIFFLE AND A TYPICAL SECTION AT A POOL. THE TYPICAL PROFILE SHOWS TYPICAL RIFFLE-POOL SEQUENCING OR STEP POOL SEQUENCING DEPENDING ON CHANNEL SLOPE.
6. IT IS INTENDED THAT THE ASSOCIATED RANGES IN CHANNEL DIMENSIONS BE UTILIZED AND THESE SECTIONS AND PROFILES WILL BE REPEATED FOR THE PROPOSED CHANNEL ALIGNMENT SHOWN IN THE PLAN SHEETS WITH SMOOTH TRANSITIONS BETWEEN RIFFLE AND POOL SECTIONS. TYPICAL SECTIONS FOR RUNS AND GLIDES WILL BE ADDED TO THE DRAWINGS FOR ADDITIONAL DETAIL IN A FUTURE DESIGN PHASE.
7. THE CHANNEL SHAPE WILL VARY WITHIN THE ALLOWABLE RANGE TO ALLOW FOR NATURAL VARIATION WITHIN THE CHANNEL AND FLOODPLAIN INCREASING THE HYDRAULIC DIVERSITY AND ASSOCIATED AQUATIC HABITAT WITHIN EACH RESTORED CHANNEL.
8. FOLLOWING THE TYPICAL PLAN AND PROFILE SHEET IS A QUANTITIES SHEET FOR EACH REACH. THIS QUANTITIES SHEET INCLUDES ASSOCIATED BANK TREATMENTS, LOG HABITAT STRUCTURES, CONSTRUCTED RIFFLES, PLANTING ZONES AND ASSOCIATED AREAS. THESE QUANTITIES WILL ALLOW FOR FUTURE ACCURATE IMPLEMENTATION, ESTIMATING, AND QUANTIFICATION OF CERTAIN METRICS ASSOCIATED WITH WATERSHED CONDITION INDICATOR (WCI) SCORING.
9. AT THE END OF THE CONCEPTUAL PLAN SET IS A NUMBER OF TYPICAL DETAILS RANGING FROM TYPICAL BANK TREATMENTS, RIFFLE CONSTRUCTION, VARIOUS WOOD HABITAT STRUCTURES, PLANTING PLAN AND SCHEDULE, ETC. EACH OF THESE DETAILS INCLUDES NOTES ON APPLICATION FREQUENCY, AND PROVIDES REPRESENTATIVE PHOTOS FOR CONCEPTUAL REFERENCE.

GENERAL NOTES:

1. THESE DESIGNS AND DRAWINGS HAVE BEEN PREPARED FOR THE EXCLUSIVE USE OF MIDAS GOLD IDAHO, INC. AND THEIR REPRESENTATIVE AUTHORIZED AGENTS. NO OTHER PARTY MAY RELY ON THE PRODUCT OF OUR SERVICES UNLESS RIO APPLIED SCIENCE AND ENGINEERING AND TETRA TECH AGREE IN WRITING IN ADVANCE OF SUCH USE.
2. THESE PLANS ARE INTENDED FOR CONCEPTUAL USE ONLY AND ARE NOT INTENDED FOR CONSTRUCTION.
3. THE ENHANCEMENT DESIGNS DEPICTED HEREIN ARE APPROXIMATE AND ARE INTENDED TO EXPRESS THE OVERALL DESIGN INTENT OF THE PROJECT.
4. DRAWING HORIZONTAL COORDINATES ARE REFERENCED TO IDAHO STATE PLANE WEST, US FEET, USING THE NORTH AMERICAN DATUM OF 1983.
5. VERTICAL ELEVATION IS REFERENCED TO THE NORTH AMERICAN VERTICAL DATUM OF 1988.
6. THESE DESIGN DRAWINGS WERE ORIGINALLY PRODUCED IN COLOR.
7. THESE PLANS DO NOT SHOW LOCATIONS OF INDIVIDUAL WOOD STRUCTURES. HOWEVER, APPROPRIATE REACHES (IDENTIFIED IN THE BASIS OF DESIGN REPORT) WILL INCLUDE WOOD STRUCTURES TO MEET DESIGN OBJECTIVES AND MINIMUM WOOD LOADING RATES.
8. FOR THE SGP STREAM DESIGN NON-PERENNIAL REFER TO A STREAM WITH DISTINCT BED AND BANKS THAT EXHIBITS SURFACE FLOW DURING ONLY A PORTION OF THE YEAR (I.E. NOT PERENNIAL).

Wetland Restoration Goals and Objectives

1. Project Goal is to design high quality replacement wetlands to be constructed over mine facilities and on adjacent lands to repair legacy impacts and replace the functions and values of wetlands removed during mine, mill, road and powerline construction.

2. Design goal is to design a complex mosaic of general wetland types which are generally classified as Riparian Fringe And Floodplain Wetlands, Valley Margin Wetlands, and Groundwater Discharge Wetlands. Restoration of wetlands presently located in Upper Blowout Creek and previously impacted by dam failure and headcutting is also a design goal.

3. Within each general wetland type described above, design a complex mosaic of wetland vegetation consisting of four general planting zones including the following:

1. *Palustrine Emergent (PEM)*
2. *Palustrine Shrub-Scrub (PSS)*
3. *Palustrine Forested (PFO)*
4. *Palustrine Aquatic Bed (PAB)*

Conceptual Design Philosophy

1. Design wetlands within lined reaches whose overall dimensions (floodplain width), configuration and location have been selected for restored stream reaches.

2. Design floodplain surface so as to be low enough so that the groundwater surface is within 12 inches of the finished floodplain elevation for all but 14 days out of the growing season in at least 5 out of 10 years. This philosophy exceeds Corps of Engineers' criteria for wetlands as defined in ERDC/EL 10-3. This results in an 'inset' floodplain surface that is in some instances lower the bankfull elevation of the stream within the floodplain.

3. Design wetlands generally within the stream reaches which are lined with an impermeable liner. This allows predictability of the elevation of the water table within the lined reach and provides certainty that the criteria noted above in 2 will be met.

4. The designs included herein are conceptual in nature and are not intended for use during construction.

5. The design sheets presented herein generally consist of a wetlands overview sheet showing the locations, types and extents of a wetlands associated with a particular stream reach followed by a wetlands planting sheet that shows the desired planting zones and vegetation within each wetland.

NOTES AND ASSUMPTIONS:

1. MINE CLOSURE GROUND SURFACE CONTOUR INTERVAL: 25' MAJORS, 5' MINORS.
2. REACH MC6 IS AN ENHANCEMENT-ONLY REACH CONSISTING OF HABITAT ENHANCEMENT BY MEANS OF INDIVIDUAL HABITAT LOGS AND BOULDERS (NOT SHOWN) DISTRIBUTED THROUGHOUT REACH (KEYED IN, ANCHORED, OR BRACED) TO MEET HABITAT AND LARGE WOODY DEBRIS LOADING OBJECTIVES.
3. HABITAT STRUCTURE SPACING AND ASSOCIATED QUANTITIES ARE SUMMARIZED IN INDIVIDUAL REACH QUANTITY SHEETS.
4. FINAL GRADE OF MINE CLOSURE GROUND SURFACE INCLUDING HANGAR FLATS PIT IS CONSIDERED PRELIMINARY AND MAY CHANGE IN FUTURE DESIGN PHASES AS THE HANGAR FLATS PIT, WETLANDS, CHANNEL, AND FLOODPLAIN DESIGN PROGRESSES.
5. HANGAR FLATS PIT POOL DESIGN WATER SURFACE ELEVATION TO BE DETERMINED AS THE CHANNEL AND FLOODPLAIN DESIGN PROGRESSES.
6. NON-PERENNIAL STREAMS FROM SURROUNDING AREAS WILL BE ROUTED TO THE EXISTING MEADOW CREEK CHANNEL.

NOTES

1. CHANNEL AND FLOODPLAIN SHALL BE CONSTRUCTED TO THE DIMENSIONS IDENTIFIED IN THE CHANNEL DEFINITION TABLES AND AT THE LOCATIONS SHOWN IN INDIVIDUAL REACH OVERVIEW PLAN SHEETS.
2. CHANNEL SIZING FOR TYPICAL POOL AND RIFFLE CROSS SECTIONS IS BASED ON CHANNEL FORMING (BANKFULL) DESIGN FLOW. DETAILED TYPICAL SECTIONS FOR OTHER STREAM HABITATS WILL BE DEVELOPED IN A FUTURE DESIGN PHASE.
3. BANK TREATMENT TYPES ARE NOT DEPICTED IN THE TYPICAL POOL AND RIFFLE SECTIONS. SEE SHEETS D-1 AND D-2 FOR BANK TREATMENT DETAILS.
4. SEE SHEETS D-3 THROUGH D-10 FOR HABITAT STRUCTURE DETAILS.
5. HABITAT STRUCTURE SPACING AND ASSOCIATED QUANTITIES ARE SUMMARIZED IN INDIVIDUAL REACH QUANTITY SHEETS.
6. SEE SHEETS D-1 AND D-20 FOR PLANTING AND SEEDING DETAILS AND PLANTING SCHEDULES.

2. FINAL GRADE OF MINE CLOSURE GROUND SURFACE IS CONSIDERED PRELIMINARY AND MAY CHANGE IN FUTURE DESIGN PHASES AS THE WETLANDS, CHANNEL, AND FLOODPLAIN DESIGN PROGRESSES.
3. REACH EF2A, EF2B, AND EF2C ARE AN ENHANCEMENT-ONLY REACH CONSISTING OF HABITAT ENHANCEMENT BY MEANS OF STRATEGIC PLACEMENTS OF LARGE WOODY MATERIAL, REGRADING OF THE CHANNEL (LIMITED TO RELIC DAM REMOVAL, CONSTRUCTED RIFFLES, AND DEEP POOL FISH HABITAT FOR IMPROVED REARING AND REFUGE DURING SUMMER AND WINTER EXTREMES).
4. INDIVIDUAL HABITAT LOGS AND BOULDERS (NOT SHOWN) DISTRIBUTED THROUGHOUT REACH (KEYED IN, ANCHORED, OR BRACED) TO MEET HABITAT AND LARGE WOODY DEBRIS LOADING OBJECTIVES.
5. HABITAT STRUCTURE SPACING AND ASSOCIATED QUANTITIES ARE SUMMARIZED IN INDIVIDUAL REACH QUANTITY SHEETS.

NOTES

1. CHANNEL AND FLOODPLAIN SHALL BE CONSTRUCTED TO THE DIMENSIONS IDENTIFIED IN THE CHANNEL DEFINITION TABLES AND AT THE LOCATIONS SHOWN IN INDIVIDUAL REACH OVERVIEW PLAN SHEETS.
2. CHANNEL SIZING FOR TYPICAL POOL AND RIFFLE CROSS SECTIONS IS BASED ON CHANNEL FORMING (BANKFULL) DESIGN FLOW. DETAILED TYPICAL SECTIONS FOR OTHER STREAM HABITATS WILL BE DEVELOPED IN A FUTURE DESIGN PHASE.
3. BANK TREATMENT TYPES ARE NOT DEPICTED IN THE TYPICAL POOL AND RIFFLE SECTIONS. SEE SHEETS D-1 AND D-2 FOR BANK TREATMENT DETAILS.
4. SEE SHEETS D-3 THROUGH D-10 FOR HABITAT STRUCTURE DETAILS.
5. HABITAT STRUCTURE SPACING AND ASSOCIATED QUANTITIES ARE SUMMARIZED IN INDIVIDUAL REACH QUANTITY SHEETS.

NOTES

1. CHANNEL AND FLOODPLAIN SHALL BE CONSTRUCTED TO THE DIMENSIONS IDENTIFIED IN THE CHANNEL DEFINITION TABLES AND AT THE LOCATIONS SHOWN IN INDIVIDUAL REACH OVERVIEW PLAN SHEETS.
2. CHANNEL SIZING FOR TYPICAL POOL AND RIFFLE CROSS SECTIONS IS BASED ON CHANNEL FORMING (BANKFULL) DESIGN FLOW. DETAILED TYPICAL SECTIONS FOR OTHER STREAM HABITATS WILL BE DEVELOPED IN A FUTURE DESIGN PHASE.
3. BANK TREATMENT TYPES ARE NOT DEPICTED IN THE TYPICAL POOL AND RIFFLE SECTIONS. SEE SHEETS D-1 AND D-2 FOR BANK TREATMENT DETAILS.
4. SEE SHEETS D-3 THROUGH D-10 FOR HABITAT STRUCTURE DETAILS.
5. HABITAT STRUCTURE SPACING AND ASSOCIATED QUANTITIES ARE SUMMARIZED IN INDIVIDUAL REACH QUANTITY SHEETS.
6. SEE SHEETS D-1 AND D-20 FOR PLANTING AND SEEDING DETAILS AND PLANTING SCHEDULES.
7. SEE SHEETS D-13 THROUGH D-14 FOR TYPICAL FLOODPLAIN CROSS SECTIONS.

NOTES

1. CHANNEL AND FLOODPLAIN SHALL BE CONSTRUCTED TO THE DIMENSIONS IDENTIFIED IN THE CHANNEL DEFINITION TABLES AND AT THE LOCATIONS SHOWN IN INDIVIDUAL REACH OVERVIEW PLAN SHEETS.
2. CHANNEL SIZING FOR TYPICAL POOL AND RIFFLE CROSS SECTIONS IS BASED ON CHANNEL FORMING (BANKFULL) DESIGN FLOW. DETAILED TYPICAL SECTIONS FOR OTHER STREAM HABITATS WILL BE DEVELOPED IN A FUTURE DESIGN PHASE.
3. BANK TREATMENT TYPES ARE NOT DEPICTED IN THE TYPICAL POOL AND RIFFLE SECTIONS. SEE SHEETS D-1 AND D-2 FOR BANK TREATMENT DETAILS.
4. SEE SHEETS D-3 THROUGH D-10 FOR HABITAT STRUCTURE DETAILS.
5. HABITAT STRUCTURE SPACING AND ASSOCIATED QUANTITIES ARE SUMMARIZED IN INDIVIDUAL REACH QUANTITY SHEETS.
6. SEE SHEETS D-1 AND D-20 FOR PLANTING AND SEEDING DETAILS AND PLANTING SCHEDULES.
7. SEE SHEETS D-13 THROUGH D-14 FOR TYPICAL FLOODPLAIN CROSS SECTIONS.

NOTES

1. CHANNEL AND FLOODPLAIN SHALL BE CONSTRUCTED TO THE DIMENSIONS IDENTIFIED IN THE CHANNEL DEFINITION TABLES AND AT THE LOCATIONS SHOWN IN INDIVIDUAL REACH OVERVIEW PLAN SHEETS.
2. CHANNEL SIZING FOR TYPICAL POOL AND RIFFLE CROSS SECTIONS IS BASED ON CHANNEL FORMING (BANKFULL) DESIGN FLOW. DETAILED TYPICAL SECTIONS FOR OTHER STREAM HABITATS WILL BE DEVELOPED IN A FUTURE DESIGN PHASE.
3. BANK TREATMENT TYPES ARE NOT DEPICTED IN THE TYPICAL POOL AND RIFFLE SECTIONS. SEE SHEETS D-1 AND D-2 FOR BANK TREATMENT DETAILS.
4. SEE SHEETS D-3 THROUGH D-10 FOR HABITAT STRUCTURE DETAILS.
5. HABITAT STRUCTURE SPACING AND ASSOCIATED QUANTITIES ARE SUMMARIZED IN INDIVIDUAL REACH QUANTITY SHEETS.
6. SEE SHEETS D-1 AND D-20 FOR PLANTING AND SEEDING DETAILS AND PLANTING SCHEDULES.
7. SEE SHEETS D-13 THROUGH D-14 FOR TYPICAL FLOODPLAIN CROSS SECTIONS.

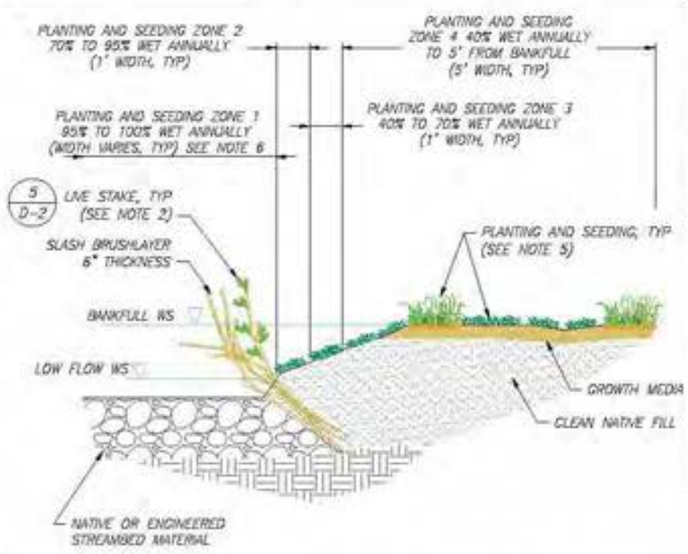
2 BANK TREATMENT B – 12 INCH SLASH BRUSHLAYER WITH LIVE STAKES

NTS



3 BANK TREATMENT C – 6 INCH SLASH BRUSHLAYER WITH LIVE STAKES

NTS

EXAMPLE: FESL INSTALLATION IN FALL DURING DORMANT SEASON

BANK TREATMENT A NOTES:

1. INSTALL BANK TREATMENT A AT LOCATIONS IDENTIFIED ON PLAN OVERVIEW SHEETS FOR EACH REACH OR AT LOCATIONS DETERMINED BY THE OWNER OR ENGINEER AT THE SPECIFIED QUANTITY.
2. SEE BANK TREATMENT SCHEDULE ON SHEET D-19 FOR LOCATION AND DENSITY OF LIVE STAKES AND BRUSHLAYER. INSTALL LIVE STAKES AND LIVE BRUSHLAYER ACCORDING TO THE DETAILS WITHIN THE PLANS.
3. SEE INDIVIDUAL REACH QUANTITY SHEETS FOR SPECIFIED QUANTITY OF BANK TREATMENT A AND ASSOCIATED MATERIAL QUANTITIES.
4. EXCAVATE SLOPE ACCORDING TO PLANS. PLACE FINE AND COARSE COIR EROSION CONTROL BLANKET AND BACKFILL WITH NATIVE SOIL TO FINISHED GRADES. USE A TEMPORARY FORM OR BUTTRESS (SEE EXAMPLE PHOTO) AT THE FACE OF EACH FESL LIFT TO ACHIEVE THE DIMENSIONS SHOWN. CONTRACTOR SHALL COMPACT BACKFILL TO APPROXIMATELY 80% OF MAXIMUM DENSITY. PULL EACH LAYER OF EROSION CONTROL BLANKET TIGHT AND ANCHOR WITH DEAD AND LIVE STAKES.
5. CONSTRUCT EACH FESL WITH 1' MAXIMUM THICKNESS USING AS MANY LIFTS AS NECESSARY TO ACHIEVE THE SPECIFIED BANK HEIGHT.
6. REVEGETATE BANK SLOPE AND TOP OF BANK AS SPECIFIED – SEE PLANTING AND SEEDING SCHEDULES ON SHEET D-20 FOR PLANT SPECIES, PLANT DENSITY, SEED MIX, AND APPLICATION RATES.
7. ZONE 1 PLANTING INTENDED FOR ANNUALLY WET AREAS LOCATED AWAY FROM THE MAIN CHANNEL OR IN ALCOVES.

EXAMPLE: SLASH BRUSHLAYER

BANK TREATMENT B AND C NOTES:

1. INSTALL BANK TREATMENT B AND C AT LOCATIONS IDENTIFIED ON PLAN OVERVIEW SHEETS FOR EACH REACH OR AT LOCATIONS DETERMINED BY THE OWNER OR ENGINEER AT THE SPECIFIED QUANTITY.
2. SEE BANK TREATMENT SCHEDULE ON SHEETS D-19 FOR LOCATIONS AND DENSITY OF LIVE STAKES.
3. SEE INDIVIDUAL REACH QUANTITY SHEETS FOR SPECIFIED QUANTITY OF BANK TREATMENT A AND ASSOCIATED MATERIAL QUANTITIES.
4. EXCAVATE BANK SLOPE, LAY LIVE STAKES AT SPECIFIED SPACING WITHIN TRENCH, COVER EACH LIVE STAKE WITH 2" OF CLEAN NATIVE FILL, AND LIGHTLY COMPACT. INSTALL SLASH MATERIAL TO THE SPECIFIED THICKNESS AND LAY UPPER LAYER OF LIVE STAKES AT THE SPECIFIED SPACING. FILL VOIDS OF SLASH MATERIAL BY WASHING-IN CLEAN NATIVE FILL. COMPLETE FINISH GRADING OF BANK BEHIND SLASH BRUSHLAYER.
5. REVEGETATE BANK SLOPE AND TOP OF BANK AS SPECIFIED – SEE PLANTING AND SEEDING SCHEDULES ON SHEET D-20 FOR PLANT SPECIES, PLANT DENSITY, SEED MIX, AND APPLICATION RATES.
6. ZONE 1 PLANTING INTENDED FOR ANNUALLY WET AREAS LOCATED AWAY FROM THE MAIN CHANNEL OR IN ALCOVES.
